

Collapsible Bulk Containers

3230

Buckhorn XT 3230 containers are industry leaders in small footprint bulk containers. They incorporate durable sidewalls and high-strength bases with 4-way forklift access for secure and efficient handling in tight warehouse space. With a compact size and generous load capacity, the 3230 containers are ideal for small work areas. They are also ideal for storing and handling a variety of small parts, resins, dry powders, and other materials. The 3230 is available in 17", 25", and 34" heights and comes with a wide variety of configurations.

BF323017

The BF323017 is uniquely designed to efficiently deliver small parts and dense components to line operations. Heavy parts can now be easily moved with a forklift or pallet jack, improving ergonomics and increasing work flow.

Standard color: Black

Note: The BF323017 is only available in the fixed-wall configuration.

BF323017

BC323025 & BC323034

Available in a wide variety of configurations including optional access doors and bulk doors, and heights of either 30" or 34", BC3230 & BC323034 are industry leaders in small footprint collapsible bulk containers. Both heights incorporate collapsible sidewalls to reduce space requirements for storage, and to more efficiently cube truck trailers, sea containers, and rail cars.

Standard color: Black

*Access Openings: - 1 or 2 Access Doors on 32" sides
- 1 Bulk Door on 32" side*

BC323025
w/ 2 Access Doors

BC323034
w/ 1 Access Door

BC323034
w/ 1 Bulk Door

Features & Benefits

Buckhorn XT Series Containers

AUTOLOCK CLIPS

Spring loaded, sliding latches automatically lock hinged sidewalls and access doors. A gentle squeeze on the easy-to-grip autolock releases the mechanism.

EASY FORKLIFT ACCESS

XT Series containers feature beveled fork entries. All provide a minimum of 4-way forklift and 2-way pallet jack access for efficient and secure handling in tight warehouse spaces.

INTERLOCKING CORNERS

A patented interlock design strengthens corners for durability under rough handling.

MOLDED-IN HINGES

XT containers feature a molded-in hinge design without metal or plastic hinge rods.

SECURE STACKING

Positive interlock ensures safe, self-supporting stacks of erected or collapsed containers in storage or in transport.

REPLACEABLE FORK STRAPS

The bases of the BY-style containers feature a unique two-part fully replaceable fork strap system that is interchangeable and can be replaced independently. This system significantly reduces maintenance costs, avoiding the need for replacing the entire base if damaged.

HIGH RETURN RATIO

Depending on the height, XT containers can save up to 60% of their original volume when collapsed. This feature reduces warehouse and storage requirements and allows cost-effective return shipping.

HIGH-STRENGTH BASE

The base of the XT container line is designed to efficiently transfer content weight to the corners, thus allowing secure stacking of fully loaded containers. Optional vented base designs provide air ventilation and drainage.

EFFICIENT CUBING

Standard, internationally accepted footprints and heights mean optimal cubing of truck trailers, rail cars, and sea containers. Please see specifications for cubing quantities.

EASY MAINTENANCE

A flat head screwdriver is all you need to replace most parts of an XT container. Sidewalls can be easily retrofitted to different height and door configurations.
