

# DOCK LEVELER / VEHICLE RESTRAINT SELECTION GUIDE

To use this guide, locate your chosen dock type among the four varieties below. (NOTE: for package selection purposes, we have grouped all mechanical dock levelers into one section.) The available vehicle restraint and control station choices will be presented in cascading format beneath. NOTE: 'Lights Package' refers to a combination of control station lights and exterior traffic lights.

## STANDALONE VEHICLE RESTRAINTS

All hydraulic standalone vehicle restraints are controlled by the Blue Genius™ Gold Series II Control Panel. The ML10 (mechanical restraint) is operated via a control rod that is shipped with the unit.
