

Introducing our new 48x40 and 48x48 shortened bins

Ideal for delicate produce

Now you can avoid unnecessary produce transfers from harvesting equipment to trucks, to boxes, to burlap bags, and a myriad of other time-consuming steps. When mounted directly on harvesting equipment, Decade containers can transport produce directly from the field to the processing facility or straight onto the truck to market. Protect your product and streamline your harvest by using a shortened bin from Decade. Our bins can be molded with your company logo and are available in the custom color of your choice for easy identification.

Your single source
for pallet and container solutions

Engineered with Produce in Mind

Constructed of high-density polyethylene (HDPE) structural foam materials to stand the test of time, Decade reusable containers are strong, yet lightweight. They offer increased life span, superior corrosion resistance, and require virtually no maintenance. Unlike wood crates that may harbor splinters, pests, pathogens, mold or other undesirable elements, Decade containers meet USDA/HACCP standards for direct food contact.

- **High concentration of sidewall & base vents** provide faster cooling, drying, and processing times than competitive plastic containers.

- **Four-way entry** allows easier handling and maneuverability.
- **Smooth surfaces** allow better pack-out; can be high-pressure washed and sterilized.
- **Rounded inner corners** minimize bruising to help maintain the quality of your produce.
- **Consistent, more accurate tare weight** than wood containers that can absorb excess moisture and water.
- **Customizable** with attachable lids, casters, drain plugs, name plates, drop doors, label holders, custom colors, and company logos.

DECADE Fixed-Wall Containers

Decade Fixed-Wall containers are built to meet the most rigorous demands. The heavy-duty construction is tough, yet lightweight, so these containers can be moved by hand when empty and are stackable up to 10 high, even when fully loaded.

Specifications

External Dimensions	48" x 40" x 20"	48" x 48" x 20"
Internal Dimensions	44.73" x 36.75" x 14.75"	44.73" x 44.73" x 14.75"
Maximum Load Capacity	1,000 lbs.	1,000 lbs.
Tare Weight	68 lbs.	82 lbs.
Maximum Stacking Load	10,000 lbs.	10,000 lbs.
Volume Capacity	108 U.S. Gallons	134 U.S. Gallons

Environmentally friendly, yet cost effective

Today, major industries worldwide are recognizing the growing importance of sustainable development and the requirement to meet the needs of the present without compromising the ability of future generations to meet their own needs. Our long and deep commitment to sustainable development is evidenced by the fact that all Decade products are made of 100% recyclable plastics, and truly represent an environmentally-friendly approach to the fabrication of high strength injection molded products.

Don't forget our full line of pallets, bulk shipping and storage containers for industrial, agricultural and food processing applications. They are engineered to stand the test of time, increase productivity and reduce material handling costs. For more information, please visit our website at www.decadeproducts.com.
