

# Vinyl

## Disposable Dunnage Air Bags

### Vinyl versus Paper

- **LESS EXPENSIVE** than paper air bags.
- Adhesive backed so they **STAY IN PLACE** when attached to load.
- **MORE EFFICIENT** than paper air bags. They conform to the shape of your product, reducing movement, and ultimately product damage.
- **EXPANDS AND CONTRACTS** easily with altitude and weather changes. Expand to twice the size of paper air bags.
- Bags **FILL FASTER**, one-quarter of the time of paper air bags.
- Uses an **EASY-TO-USE AIR INFLATER**. **YOU CANNOT OVER-INFLATE.**
- **REUSABLE** up to 4 times.

2-sided tape allows for easy installation prior to inflation

Easy to use on single or double stacks

### The Next Generation of Dunnage Air Bags

#### TESTIMONIAL

"Centerload Shipping Technologies has helped us at Jody Cold Storage revolutionize our shipping methods by providing us with an air bag that not only facilitates centerline loading, but also secures our loads. The result: improved temperature control and a 100% reduction in damage. In addition, the custom screen printing on every bag provides us with billboards in transit."

Mark Laliberte, Jody Cold Storage

### As Simple as 1.2.3

- 1 Adhere air bag to load using adhesive strips on bag.
- 2 Attach self-locking air inflator to valve.
- 3 Engage inflator and walk away to set next air bag. Inflater is equipped with auto shut-off so bag cannot be over filled.

**You ship, you have damage, and you have claims...  
...We have your solution!**

- Turbo Fill Valve
- Flaps and/or 2-sided tape for ease of installation.
- Durable 0.25mm vinyl walls
  - Accessible center valve placement.
- 100% Recyclable
- Optional custom logo printing on each air bag.
- Multiple sizes available, including custom sizes.
- Approved by the Association of American Railroads for applicable intermodal shipments.
