

FOR THE GREATEST LOAD
HOLDING STRENGTH

SYNERGY 2[®]

With Dual Hydro-Stretch[®]

Reliable
Allen-
Bradley
PLC and
NEMA 12
controls.

Strength, Speed, Savings

The Synergy 2 with Dual Hydro-Stretch[®] delivers more load-holding strength than any other stretch wrap system available! The fast 12 RPM turntable wraps your loads quickly. The Allen-Bradley PLC with three unique wrapping patterns insures reliability and flexibility. The Synergy 2 is the most advanced system in its class, delivering more load-holding strength, speed and savings.

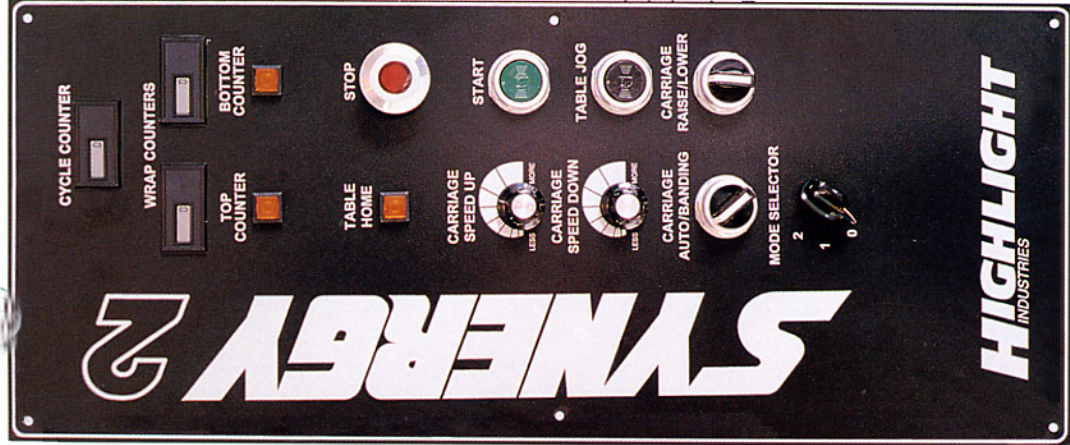

- **Dual Hydro-Stretch[®]**, a feature exclusive to Highlight Industries, provides two independent levels of stretch: one for the bottom of the load, the other for the rest of the load. Over 70% of film breaks occur at the bottom of the load where the load and pallet meet. Dual Hydro-Stretch[®] allows you to set the stretch level at the bottom of the load *independent* of the stretch level on the rest of the load. This allows loads to be wrapped tighter at higher stretch levels and at lower costs.
- **Highlight Heavy Duty** is the design of the Synergy 2. Its durable, heavy duty turntable has a 3/4 HP DC motor with soft start and adjustable speed from 0-12 RPM.
- **Built for the Future**, state-of-the-art controls are easy to use, and offer flexibility with 3 built-in wrapping patterns.

Fast 12 RPM
Low Profile 5000 lb. capacity shown
High Profile 4000 lb. capacity also available

EASY TO USE CONTROLS

CYCLE COUNTER records number of loads wrapped and assists in scheduling maintenance. Optional resettable cycle counter available.

TOP & BOTTOM WRAP COUNTERS place additional film for extra load stability.

TABLE HOME indicates that turntable is in the home position.

CARRIAGE SPEED UP and CARRIAGE SPEED DOWN allow for faster wrapping cycles, less film usage, and more flexible wrapping patterns.

TABLE JOG rotates the turntable with the push of a button.

CARRIAGE AUTO/BANDING allows spiraling up and down or banding to reinforce the load in selected positions.

CARRIAGE RAISE/LOWER moves film carriage up or down.

MODE SELECTOR easily changes wrapping patterns for lower cost, better unitization.

Working in synergy to satisfy YOUR packaging needs.

SPECIFICATION SHEETS with all technical, engineering and floor plan information are available. Contact your Highlight distributor for additional information.

AVAILABLE OPTIONS TO BUILD THE SYNERGY2 FOR YOUR APPLICATION:

- Extended frame for larger loads
- Extended mast for tall loads
- 30" film capacity
- Dual turntables
- Scale systems for wrap & weight
- Conveyorized system
- 6,000 pound load capacity

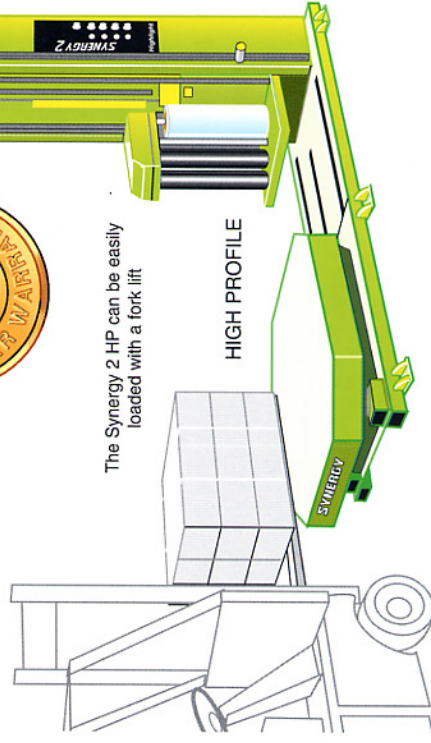

Many other options and custom designs are also available.

Choose the Synergy 2 model best suited to your needs.

The Synergy 2 LP ramp locks into three different positions for convenient hand pallet jack loading.

The Synergy 2 HP can be easily loaded with a fork lift
