### CONSTRUCTION

- Stiffness highly improved as opposed to conventional models, thanks to the sturdy built-in ribs, allowing stability and security during handling.
- Reinforced posts, especially designed to resist impact and wear.
- Strong and practical handles with lateral opening, which prevents dirt accumulation.
- Hard-wearing flat bottom.
- Meet FDA and HPB requirements and chemically inert.

### IMPRINTING

- Can be branded for identification purposes having customer logotype hot stamped or embossed.
- Imprinting protected by ribs and always made on the same side for fast and easy stacking.
