Your Key to Innovative Shelving Solutions

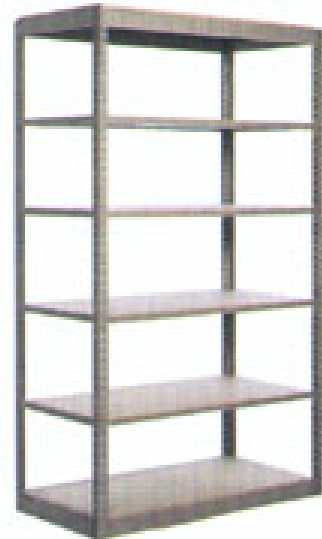

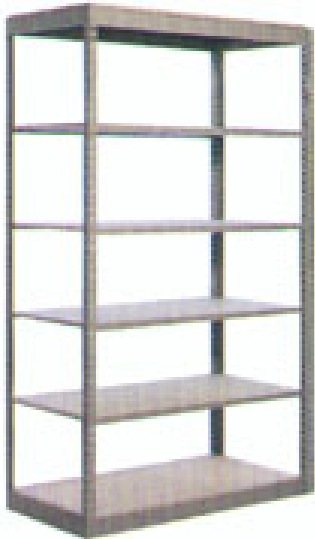

Boltless Shelving

www.teilhaber.com

SHELF boltless shelving is manufactured from high quality 14 gauge steel. Components are simple to assemble with a hammer. No special tools are necessary. Our shelves are adjustable on 1 1/2" centers, engineered to be simple to use as a single unit and flexible for use in a complex system. Units require no sway bracing allowing easy access to all four sides. Our standard paint finish is baked-on enamel. Galvanized or zinc plated is available on special order.

Standard Duty Units have a per shelf capacity of 350 pounds and utilize our single rivet beam on intermediate shelf levels. Each shelf 24" deep or less does not require front to back beams on intermediate shelves.

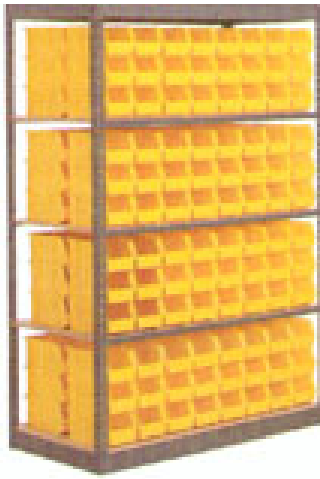

Medium Duty Units have a per shelf capacity of 480 to 600 pounds and utilize our double rivet low profile beams. Each shelf level has a full perimeter of steel. Consult our Beam Capacity Chart for specific requirements.

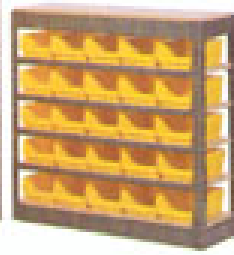

Heavy Duty Units have a per shelf capacity of 900 to 2000 pounds and utilize our double rivet beams. Beam tie shelf supports are also used when required. Consult our Beam Capacity Chart for specific requirements.

Wide Span Units have a per shelf capacity of 500 to 1400 pounds and utilize our double rivet or double rivet channel beams with beam tie shelf supports on each shelf. Consult our Beam Capacity Chart for specific requirements.

Bin Storage Units

Q SHELF components are durable and can be used in a wide variety of practical applications: industrial, commercial, office, record storage, and many more.

Q SHELF units are completely free standing. Our distributors know our emphasis on quality, service, dependability and safety gives you, the customer, the best value in the market today.

Q SHELF gives you the flexibility you want. Pre-engineered components are reusable. Components used in one configuration can easily be disassembled (in most cases by one person) and reconfigured for use in another application. Consult our Beam Capacity Chart for specific requirements.

SHELF is efficient, the 84" x 69" x 32" unit shown can store 80 record boxes in approximately 15 square feet of floor space.

SHELF is durable, rigid and easy to assemble. Our 14 gauge material hammers together quickly, seats firmly and is self squaring.

SHELF is versatile. From office to attic • warehouse to showroom • 3,000 to 300,000 square feet, our products and designs will help make your life simple.

A no cost on-site survey to assess your needs is available by contacting your local distributor.

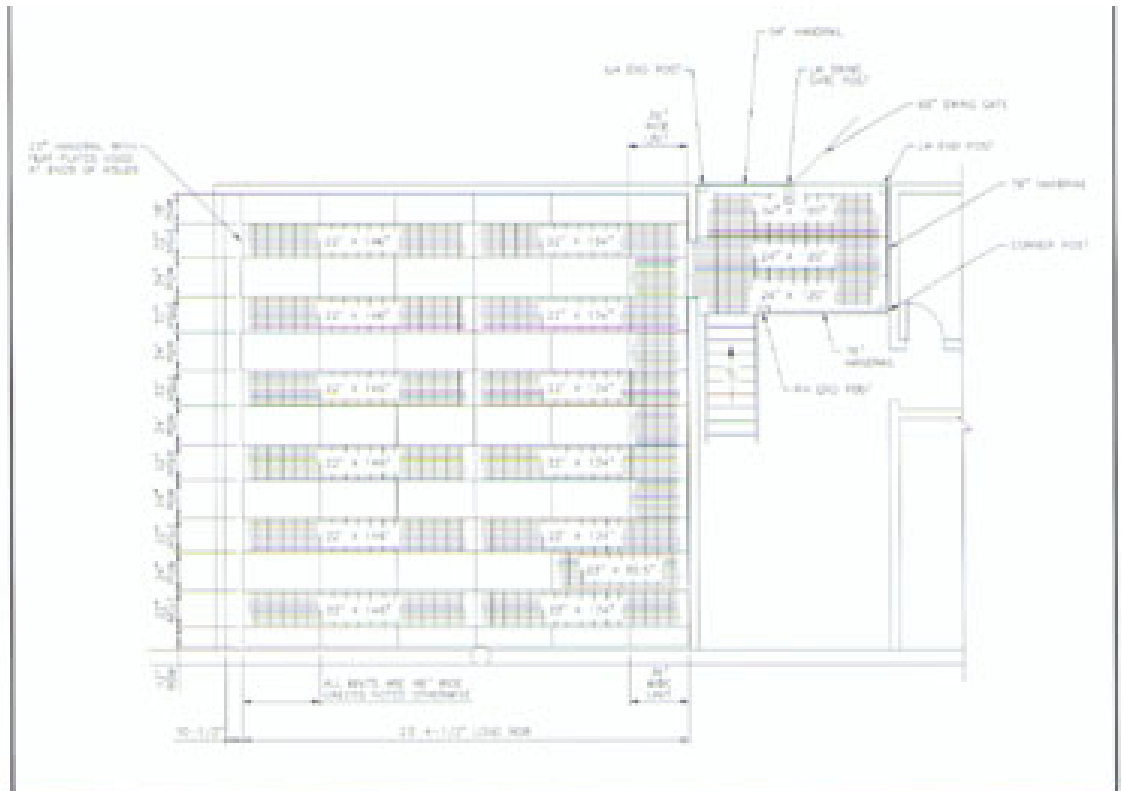

Office Solutions

Commercial Records Center

SHELF's focus on design, layout and rapid response is our hallmark. Our CAD department, working with you, will design a system and provide a "roadmap" that will permit you to plan your growth efficiently and maximize your return on investment.

A numbered row system and volume chart gives the number of boxes per row and the total for the complete layout. **SHELF** offers you 2 or 3 boxes high by 2 or 3 boxes deep. Standard sizes made specifically for the records storage industry maximize the cube of your building.

SHELF provides the flexibility to keep pace with film media's ever-changing demands. Storage for CD, 4mm/8mm, 3480, TK50, microfilm and reels is available. Innovative designs and custom solutions are what make **SHELF** products and services so valuable. Many of our current products are a direct result of inquiries from individual record centers.

SHELF serves small entrepreneurial start-up companies, individual record centers and the nation's largest records management companies. Our quality, durability and service makes us the best storage value in the market today.

RACK products offer the same quality, durability and value.

SHELF offers a wide variety of shelving and rack systems designed to maximize your space and improve efficiency.

SHELF systems are designed using pre-engineered components. Factory designed layouts to meet seismic zone requirements and national building codes are recommended to ensure a system that is safe to work around year after year.

By making full use of your floor-to-ceiling height, you'll insure the system you are purchasing is the most efficient system for your facility. Units can be designed from 24" to 336" high.

Storage for CD, 4mm/8mm, 3480, TK50, microfilm and reels is available.

INTEGRITY

COMMITMENT

EXPERIENCE

RELIABILITY

Q-SHELF mezzanines transform overhead airspace into usable storage areas. Storing up, instead of out frees valuable floor space. Shelving units connected by grating and grating supports create elevated walkways that allow for easy picking of products from shelves without mechanical devices or ladders.

Q-SHELF products and designs have been used in the construction of full mat mezzanines and elevated walkways for over 20 years. Our components are among the strongest in the industry and because we also manufacture pallet rack, customizing a system to your specific need is not a problem.

SHELF mezzanines are designed to satisfy your specific capacity requirements in concert with OSHA, UBC and BOCA regulations. SHELF mezzanines feature the finest components—structural stairways, platforms and landings, handrail, kickplate, single or double swing gates to mention a few. Our most commonly used decking material has 80% open area allowing maximum ventilation and lighting.

SHELF free standing mezzanines can double your warehouse capacity with minimal overhead increase. Mezzanines are built to your height and clear span specifications to fit around and over your current operations. Maximizing the use of the available space in your facility is what we do!

SHELF automotive units provide an efficient way to store large items. Each modular unit is made in a wide variety of sizes and with vertical adjustability on 1 1/2" centers, you can create openings to fill your every need.

Tire Storage

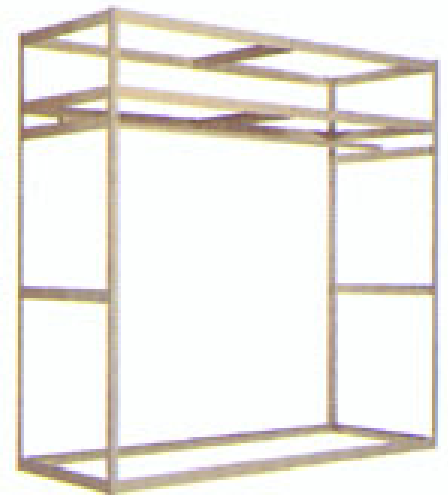

One level to multi-level for tires and wheels.

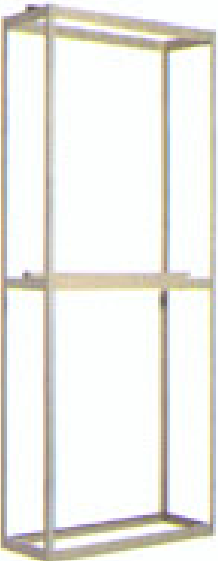

90" x 90" x 30"
H W D

Quarter Panel & Hood Storage Units

A great way to prevent damage to expensive sheet metal items. Take advantage of your ceiling height by adding an upper shelf or two for grills, gas tanks, etc.

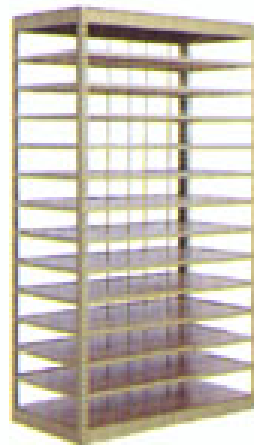

90" x 90" x 30"
H W D

Hanging Pipe Storage

Vertical Storage for efficient aisles and easy access.

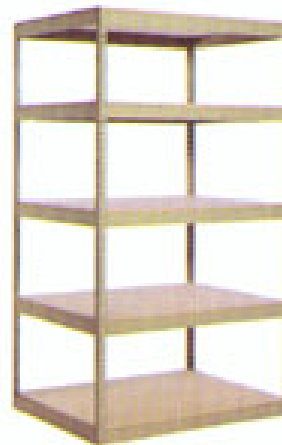

120" x 48" x 19"
H W D

Molding Storage

Organize moldings in a numeric system. A 48" deep shelf surface best accommodates flexible and rigid moldings of various lengths.

84" x 48" x 24"

Board Options

Quality, economy, durability and selection are what our wood shelving products provide.

Assembly

Q-SHELF units are durable, rigid and easy to assemble. Our 14 ga. material hammers neatly into place, seats firmly and is self squaring.

SHELF components are engineered to be compatible with each other, easy to install and flexible for use in a variety of designs. Our decking materials are safe, long-lasting, high quality products that complement any system or unit you choose.

With **SHELF** you get more than a storage solution, you get the experience and support from a manufacturer with over 20 years manufacturing expertise, a design staff that is accessible, and the flexibility to get custom components fast, at affordable prices.

SHELF products are made in the U.S.A. by a wholly owned and operated U.S. Company and are available throughout the United States and Canada. In most cases your system can be designed, manufactured and installed in 30 days. We're proud of our quality and service. We love our product and we know you will too.
