TRAX Plastic Strip Doors

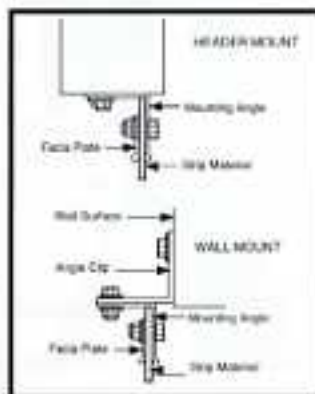

Something For Every Strip Door Application

TRAX Plastic Strip Doors provide an excellent solution to a variety of environmental challenges in the work place. They provide an effective thermal barrier, keeping the cool and warm air exchange to a minimum therefore dramatically reducing energy costs and providing a more comfortable working environment. Noise, dust, drafts and rain are also controlled using **TRAX** Plastic Strip Doors.

Warehouse or loading dock doors are made of 8", 12", or 16" wide strips with our complete galvanized steel hardware assembly.

All **TRAX** Plastic Strip Doors are available in standard clear vinyl, USDA Low-Temp material for below freezing applications, and the unique Full-Rib & Tear Drop Edge designs for greater strength and durability when used in cart and forklift traffic areas.

Galvanized Steel hardware Assembly

Saves Energy Dollars!

STRIP-EASE

Personnel Strip Doors

Combining our Necor Tear Drop Edge strips with our Seal Tech hardware system, **TRAX** Strip-Ease Style Strip Doors are ideal for any opening up to 10' high. They are made of 4" or 8" wide strips and are perfect for walk-in coolers and freezers!

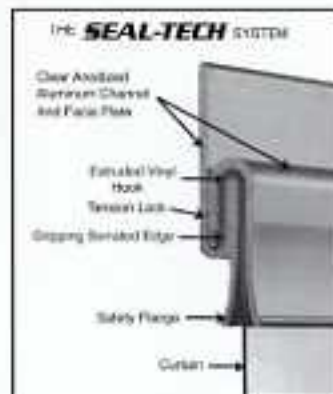

Helps Prevent Spoilage!

Installs Effortlessly!

The innovative Seal Tech hardware system makes installation and strip replacement simple. Once the mounting channel is anchored to either header or wall no further nuts and bolts are required! The extruded vinyl hook on top of each curtain is secured to the mounting channel by the snap in place cap piece.

Installs as easy as...

TRAX Clean Room Curtains

TRAX Clean Room Curtains are the favored method of creating contamination free environments. They provide an economical alternative to high priced hardwall structures without compromising results.

Variety and flexibility are the best words to describe **TRAX** Softwalls and Strip Curtains. Our large assortment of materials and attachment methods provide the variety. The fact that each curtain is custom made for your unique requirements and to your individual specifications assures the flexibility to assist in any controlled environment application.

Material Options

TRAX Softwalls and Strip Curtains are custom made with crystal clear Standard and Anti-Static material in 12, 20, 40, 60, and 80 mil thicknesses. Available colors include Yellow, Red, Opaque White, and Opaque Black to name but a few. All materials are also available in roll form for strip replacement or do it yourself projects.

Attachment Methods

TRAX offers a complete selection of effective attachment methods for your Clean Room Curtain requirements. Whether it is the convenience of Dual-Lock, the visual appeal and installation ease of Seal Tech, or the versatility of our Sliding Track hardware, **TRAX** has the attachment method to enhance your enclosure project.

Welding Curtains & Black-Out Curtains

Protection And Visibility

TRAX Welding Curtains provide protection against hazardous glare and flying sparks from your welding operation. Serious eye damage is avoidable by the screening out of harmful U.V. rays.

Unlike conventional welding screens, all **TRAX** Welding Curtains allow crucial visibility into and out of the work area.

Block Harmful U.V. Rays !

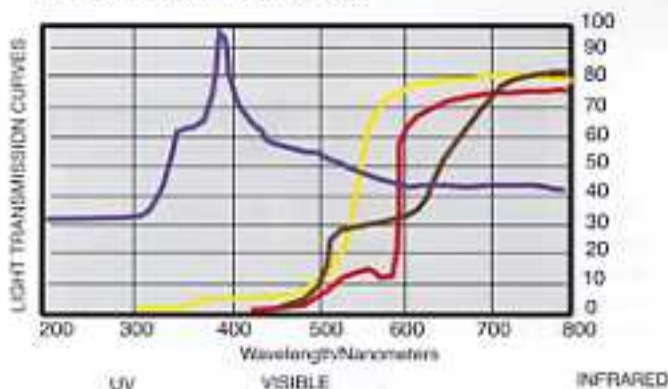

DARK AMBER STRIP CURTAINS

YELLOW AND CRIMSON SOLID WELDING PANELS

Ultraviolet Resistance

TRAX Welding Curtain material is formulated to deter the affects of ultraviolet light. This chart shows the correlation between a carbon arc and our UV restricting materials.

TRAX Black-Out Curtains restrict light into light sensitive work areas. They also can be adapted to any of our attachment methods. Different color options are available

Laser Barrier Curtains

LASER SHIELD

TRAX Laser/Shields are designed to perform where a true laser barrier is required. They can be adapted to any of our attachment methods and are available in low power, light duty, & heavy duty models.

Low Power
30 w/cm²
5mm Beam Diameter
100 Seconds

Light Duty
100 w/cm²
5mm Beam Diameter
100 Seconds

Heavy Duty
300 w/cm²
5mm Beam Diameter
100 Seconds
