**OUR**  
CONTAINERS MAY  
**FOLD**  
BUT NOT OUR  
COMMITMENT

In fact, our Folding Wire Mesh Container shows just how totally committed we are. Its combination of economy, flexibility and functionality makes it the most effective and efficient choice for the vast majority of material handling, shipping and storage applications. It gives you the full functionality of a wire mesh container (easy to see the inventory, maintenance free, etc.) yet it folds down neatly and economically for storage or shipping. To further show you how committed we are to you, we're ready to change, redesign or create a whole new folding wire mesh container to fit your unique applications. It would be difficult to be any more committed than that.

# Folding Wire Mesh Containers

American Wire Products' Folding Wire Mesh Container is an essential and flexible unit for material handling and storage. It's lightweight yet can hold up to 4,000 lbs., durable yet low cost, can be used for a multitude of tasks yet is virtually maintenance free. Three of our most popular folding wire mesh containers are available from stock (48 hours upon receipt of order).

## Dimensions:

- 32" x 40" x 28"
- 40" x 48" x 30"
- 40" x 48" x 36"

The container not only folds to save you storage/shipping space, it can be stacked four high when loaded to save you warehouse space. Each container in the stack can hold up to 4,000 lbs., a total of 16,000 lbs. in an area as small as 32" x 40". And the mesh design makes everything in the containers visible for quick inventory checks.

There are also unique safety features, such as the safety locks that guard against accidental openings and the Safe-T corner reinforcing rings that prevent distortion. Five gates styles make it easy to get the material inside.

As with all our products, American Wire Products is always ready to custom build wire mesh containers to your unique specifications. There are also a number of options you can choose with our standard folding wire mesh containers, including:

- Cap channel over wire perimeter for added production
- Square-Stack legs for secure stacking
- Tags, labels, card holders
- Five gate styles: 1/2-drop side/end; partial-drop sides and/or end; swing out end(s)
- Casters, fork sleeves, runner bars
- Dividers or security lids
- Custom feet available
- Custom colors

## Sixteen reasons your American Wire Products' Folding Wire Mesh Container won't fold under pressure:

- Safe-T corner rings for reinforcement
- Safety locks to prevent accidental openings
- Double-bead wire perimeter
- Heavy-duty 2" 13-gauge channel, heaviest in the industry, for increased capacity
- U-loop to keep end panel in place for added stability
- Heavy-duty leg with double-gusset design welded to inside and bottom of base channel
- Full-perimeter base frame protects helix (spiral) and allows side-by-side stacking
- Up to 4,000 lbs. capacity
- Collapsible
- Five gate styles
- Open-mesh design for visible inventory
- Three standard stock container sizes
- Enamel paint (oven-baked gray or custom) to prevent rust and abrasion
- Can be custom made to your specs
- Most versatile wire mesh container in the industry

## A unique part of the American experience

We know that no matter how much you love our wire mesh containers, you would love them more if they cost less. That's one of the reasons we're always looking for ways to be more efficient and increase our productivity. That way, we can lower the price while maintaining or even increasing the quality. It's just one of the many things that makes the American experience unique. To put our experience to work for you, call
