

BERRY PALLET

Stratis worked with some of the most successful berry picker/processors in North America to design a super heavy duty food grade plastic pallet that interfaces with major brands and styles of berry trays used today. These stack, rack and transport safely.

Tray-Lok feature/conveyorable.

Stratis Deck-Lok safety stacking feature allows empty pallets to stack empty without sliding.

Forklift safety straps connect the legs and have scallops on the bottom to extend the effective area of safety.

Molded-in ergonomic under deck hand holds.

Molded-in nameplate for customer logo.

Inprinting available on one or two sides, with optional name plate. Minimum order of (6) required. Contact us for details.

Molded-in date stamp provides date of manufacture.

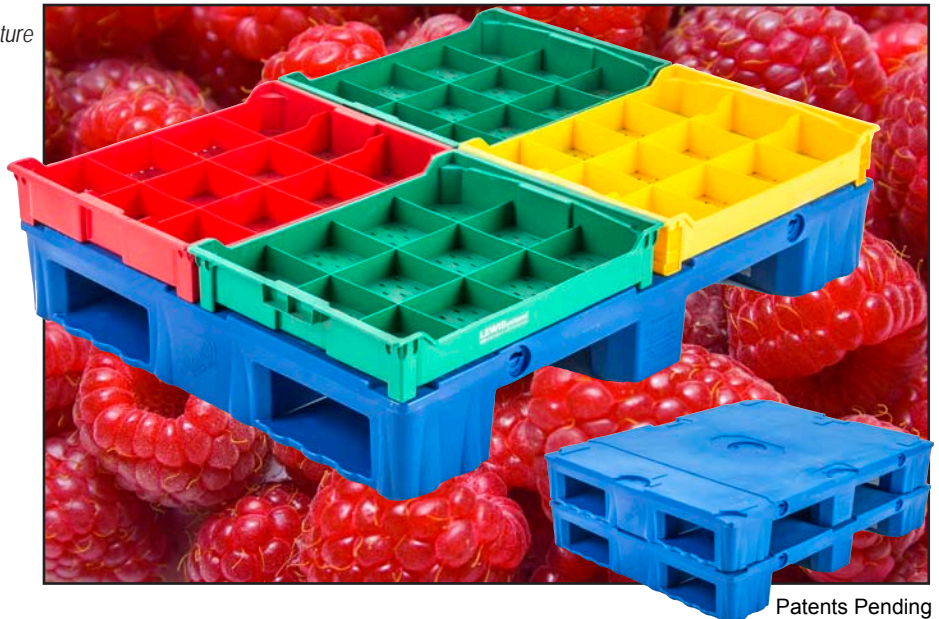

Berry Pallet is designed so when one pallet is on top of a pallet with trays the pallet touches the tray top evenly.

Stratis Berry pallet accommodates multiple types of stacking trays.

Pallets are made from USDA/FDA approved materials and last 10+ years in typical plant applications.

Patents Pending

Sanitary • Durable • Safe • Rackable

Part Number	Description
P4736S47-2SSW	46.88" X 36.25" X 7.25" (119CM X 92CM X 18.4 CM) 57 tare weight

Pallets per stack = 14 pallets - Stack for a 53 foot truck = 30 / 420 units total
 Stack 4 stacks of 20 each, for a total of 80 trays per pallet.
 Stack pallets two high when trays are loaded.
 Can be stacked higher when trays are empty and each pallet load is wrapped.

Soft berry processing companies using stacked plastic trays on custom made wood pallets are having huge problems with dirty, smelly almost rancid juice laden wood pallets. Insect infestations, tipping, sliding off of trays, breakage of trays by the tray legs, and worries that inspectors could come in and swab these wood pallets that are in processing areas and find something bad are a continuing concern.

- This Berry pallet will allow you to double stack and react the same way as a wood pallet.
- Without leaving pieces of wood or debris behind.
- Without any weight variances from beginning to end of season.
- No injuries due to wood chips and or splinters when handling.
- No repairs or replacement of pallets. Plastic pallet life span will be much more than wood.
- Wood Pallets repair and replacement average by grower 20% to 30% each year.
- Consistent tare weight for in plant weighing.
- Unsupported racking on 48" long sides of pallet.
- Cleanable between uses to assure sanitary applications.
- Will interchange with wood to allow you to phase in vs. replacing all wood.
