

# PE Stamped Drawings

PE Stamps on Cubic Mezzanine drawings and calculations assure design integrity and total structural safety and decrease customer liability. Without them, permits cannot be obtained, building code compliance is questioned and safety could be compromised.

Cubic Designs is registered in over 35 states and each Cubic Mezzanine is designed under the direct supervision of on-staff registered professional engineers. This service relieves you and your customer of total design responsibility.

Plus, we take care of all the details - from helping you determine application needs, to on-site measurements, to complete system design, fabrication and installation.
