RACX™ Picture Frame Pallet

RACX™ Picture Frame Pallet

Premium Performance at an Affordable Price

Decade's new RACX™ pallet combines strength and economy in a lightweight one-piece design for superior performance at an affordable price. Fabricated of recycled HDPE plastics, these rackable pallets feature a picture frame bottom with runners on all four sides for stability. They are ideal for use in warehouse racking systems, as well as stack loading, closed loop transport, floor storage and automated material handling applications. In addition, RACX pallets are engineered so that the bottom pallet can handle the full static load when loaded pallets are stacked 2 or more high; and offer unsupported rack capacities up to 2,200 lbs.

Available in a standard size of 48 x 40-inches, RACX pallets may be fitted with optional rubber grommets or lip to keep contents from slipping. Static load capacities are rated to 25,000 lbs., and dynamic loads to 5,000 lbs.

Specifications

for RACX™ Pallet

Part Number DP4840

Dimensions (inches)	48 x 40
Height (inches)	6.1
Weight (lbs.)	34
Truckload Quantity	540
Dynamic Load (lbs.)	5,000
Static Load (lbs.)	25,000
Racking Load (lbs.)	2,200
Grommets	Optional
Lip	Optional

Committed to Sustainable Development

Today, major industries worldwide are recognizing the growing importance of sustainable development and the requirement to meet the needs of the present without compromising the ability of future generations to meet their own needs. Decade Products' long and deep commitment to sustainable development is evidenced by the fact that all of our pallets are made of virgin HDPE or recycled plastics, and truly represent an environmentally-friendly approach to the fabrication of high strength injection molded products. And under our unique "buy-back" program, they can be absorbed into our recycling system to go toward the purchase of new pallets, thereby lowering your costs as well as helping the environment.
