

What is Sæplast® PE?

Sæplast PE: Triple Wall design of chemically bonded polymers that provide the most rugged, safe food container on the market.

Why worry about running out of floor space when you can stack the Sæplast PE containers and avoid the madness of overcrowding on the plant floor?

Get rid of cardboard, wood, plastic poly bags, plastic poly caps and inferior designed single wall plastic containers and move to the rugged one-piece triple wall Sæplast PE Containers.

Features & Benefits

- ✓ Triple-layer Polyethylene - unmatched strength.
- ✓ Closed Cell Core design - does not absorb liquid, optimizing hygiene.
- ✓ One-piece construction with smooth walls - easy cleaning and sanitation.
- ✓ Controlled manufacturing - consistent tare weights.
- ✓ Meets Land-Fill Free initiatives – do not require poly bag liners or caps.
- ✓ Stacks 100% safe with or without a lid.
- ✓ Offers the lowest total cost of acquisition of any container in the market.
- ✓ Light weight – employee safe.
- ✓ Forgiving in refrigerated or cold environments - will not crack.

Sæplast PE...Tough!
