# FAST LOCK<sup>®</sup>

Adaptable Interlocking Pallet and Storage System

## Customer Testimonial

*"We made the change to Fast Lock and found the system easy to use and a great price. We liked it so much that we ordered more and now use this storage system throughout our entire hospital."*

Daryl Gardner, Director of Maintenance  
Oasis Hospital, Phoenix, AZ

## MEETS JOINT COMMISSION STANDARDS (EC.02.06.01, IC.02.02.01)

Units Stack for Storage

Four Unit Assembly (40"x48")

Two Unit Assembly (40"Wide x 24"Deep x 6" Tall)

6" Tall

Listed below are two of the most common standards and violations which are found at healthcare facilities. **These can be eliminated or minimized by using Fast Lock to properly store and organize items.**

Joint Commission Std.	Description of Problem	THE FAST LOCK SOLUTION
<b>EC.02.06.01:</b> The organization establishes and maintains a safe, functional environment.	Cluttered aisles, unorganized supply rooms, cluttered work areas, no uniform standards from floor to floor or area to area.	The Fast Lock System provides an easy solution to organize supplies and can be used seamlessly across multiple departments.
<b>IC.02.02.01:</b> Hospital reduces the risk of infections associated with medical equipment, devices and supplies.	Items being stored need to be off the ground to avoid contamination and infection.	Each Fast Lock unit is 6" high and provides a solution that can reduce the risk of infection by storing supplies and materials off the ground at the required height.

## FAST LOCK<sup>®</sup> BENEFITS

### ADAPTABILITY

adapts to your current situation or load.

### DURABILITY

patented interlocking technology holds strong in any situation.

### EASE OF USE

simple locking system allows for quick and trouble-free assembly of each lightweight unit.

### SAFE & EASY STORAGE

units store easily before and after the job; giving you better use of your space.

### FREEZER & FOOD SAFE

withstands temperatures down to -36 degrees F and meets FDA standards for non-direct food contact.
