

**KTBIN® THE MULTI PURPOSE
BULK CONTAINER SYSTEM**

KTBIN®

Features

- *The bin that grows with your needs from single up to triple height*
- *Space savings of up to 63%*
- *Comprehensive solutions for the whole supply chain*
- *Unique removable walls*
- *Quick and easy assembly*
- *Patented locking design*
- *Hygienic smooth surfaces*
- *Available with solid or perforated wall sections*
- *Four-way forklift entry*
- *Removable walls provide easy access for ergonomically correct loading and unloading*

KITBIN® THE MULTI PURPOSE BULK CONTAINER SYSTEM

One Modular Product For Many Kinds of Solutions

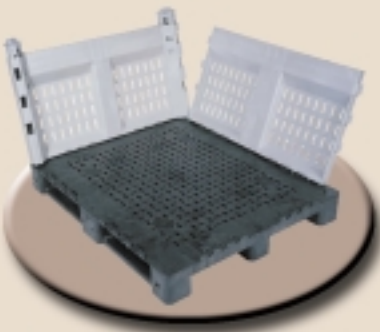

The *KitBin*® is a uniquely designed system offering considerable flexibility.

The system is comprised of a pallet base and four independent sides, fitted together to create a strong and durable container whilst offering space savings when not in use.

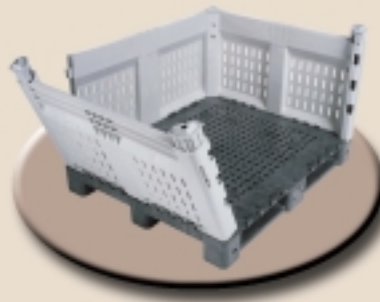

- The unique interlock mechanism is the key to the *KitBin*'s flexibility. It allows each side panel to be locked into position around the pallet base giving added strength. This enables sidewalls to be built up to three high giving one container a range of heights from 715mm to 1845mm.
- The base can also be used independently as a standard pallet when the sidewalls are not required.
- Units are moulded in tough structural foam and have been designed to withstand impact, resulting in vastly improved product protection and reduced product damage during transit.
- The true modular construction of the system also means simpler and easier repairs.

Easy and Simple Assembly

- 1 Insert side wall panels into pallet base.

- 2 Align sidewalls so that interlocking mechanism can be engaged.

- 3 Repeat steps 1 and 2 for other walls.

Unique design patented lock

1

2

3

The patented design allows any of the walls to be completely detached from the pallet base so that the container can be filled from the front by leaving one wall detached

Walk-in system

Any wall can be easily removed and the system becomes a Walk-in system.

- Easy access
- Ergonomically Correct

Four way forklift entry

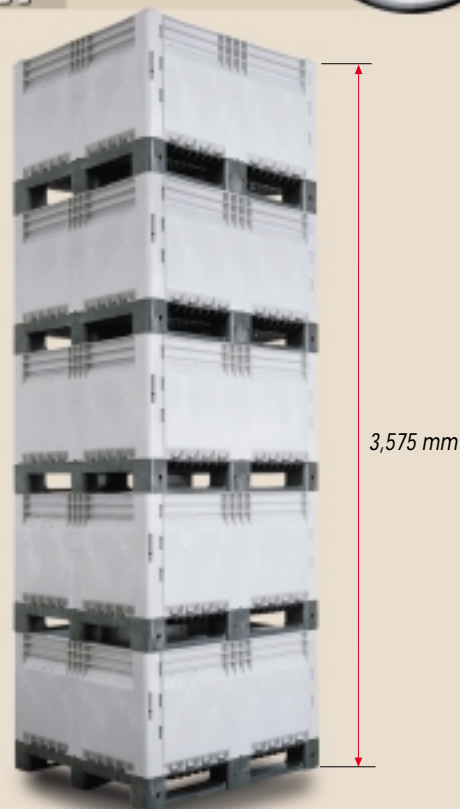

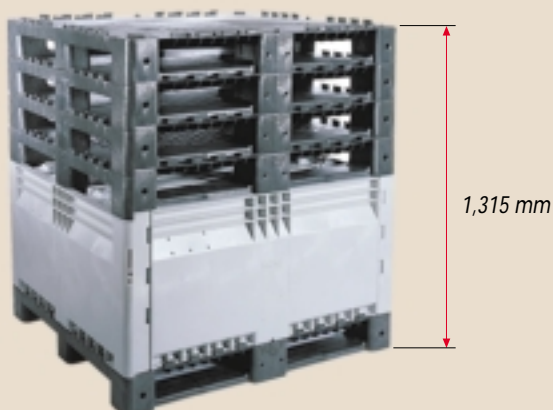

KITBIN® THE MULTI PURPOSE BULK CONTAINER SYSTEM

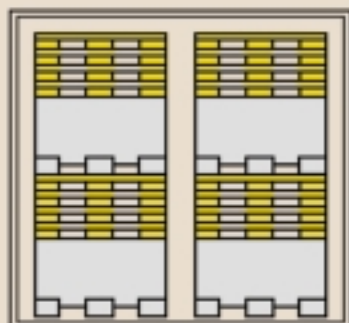

Space saving

Four disassembled containers fit into one *KitBin*® with the pallet bases nested on top. Five Kitbins can therefore fit into the same footprint as one. It means savings of up to 63% storage area space.

Sea transportation

Folded KitBins in Containers (units)			
	20'	40'	40' HC
Single Height Kitbin	80	176	216
Double Height Kitbin	45	105	149
Triple Height Kitbin	45	95	105

KitBin® with Lid

KitBin® with Wheels

KitBin® with Door

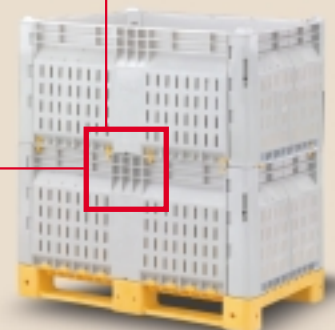

Modular products

Variable height options

The inherent internal strength of the *KitBin®* and its locking mechanism means the sidewalls can be built up either two or three units high on one pallet base, giving one container a range of heights from 715mm to 1845mm.

Ideal for bulky items or where transport / storage space is at a premium, *KitBin®* is also available with a special wall option which allows side access to the contents within the container.

Maximum loading 600kg per unit.

KTBIN®

Company Profile

Dolav Plastic Products was established in 1976 in southern Israel. The company specialises in large structural foam injection mouldings. Dolav Plastic Products utilises advanced technology and equipment to manufacture heavy-duty box pallets that are unique. They are easy to clean, resistant to corrosion, durable and lightweight.

Our boxes are UV resistant, and can withstand a wide range of temperatures. They are manufactured in either solid or perforated, in various sizes and colours, and can be safely stacked 6 high.

DOLAV box pallets are used in all kinds of light and heavy industries - agriculture, food, fishing, recycling industry, chemical, textile, pharmaceutical, etc.
