

Clean
**CURTAIN
WALLS**

Goff's Clean Curtain Walls

Maximize productivity by separating washdown areas.

Clear PVC industrial curtains designed to separate & contain overspray.

The way you use your space can change. Now your walls can, too.

Wash down procedures often require an area of a facility to shut down losing business profit and productivity. Clean Curtain Walls maximize productivity within your food processing space. **Separating production lines during wash down cycles means less idle time and more productive hours at your facility.**

Pick flexible curtain walls over permanent construction.

Permanent walls are expensive & can't adapt to changing processes. Clean Curtain Walls can be reconfigured as needed to best suit changing facility needs, making sure your facility is always maximizing efficiency.

Separate processing lines for continued production.

Continue to operate other production lines while only one line is shut down for cleaning and sanitizing to reduce overall downtime.

Flexible design made custom for your facility.

Supported by our modular track, our curtain wall systems can be reconfigured or added to later to continue optimizing your space, even as your business and processes change.

Make installation & daily use simpler.

Purchase Goff's pre-configured track to simplify installation, designed to fit your facility with the ability to be reconfigured as needed for years to come.

- Stainless steel track and trolley system uses flexible mounting points to simplify installation.
- **Open trolley design prevents bacteria buildup** to maximize sanitation cycle effectiveness & protect production areas.
- **304 Stainless Steel & Delrin rollers** are rust and corrosion resistant to stand the test of time.

Maximize your clean space:

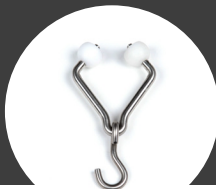

Our Clean Curtain Walls allow you to keep separate lines or machines up and running while others go through wash down cycles, keeping your operation up to code while producing at optimal capacity.

We offer two different track options for our Clean Curtains, depending on your mounting point availability & requirements for future relocation.

STANDARD TRACK

Modular design crafted from 304 stainless steel.

Fixed support points are configured to mount to existing building structural supports.

PREMIUM TRACK

Modular design crafted from 304 stainless steel.

Flexible design features multiple connection points across the entire length of track.

Integrated bracing offers **increased rigidity**.

Both track options feature our **open trolley design** for smooth & reliable wash down operation.

Clean Curtain Walls are constructed with the quality materials your facility requires.

Goff's Clean Curtain Walls are manufactured in the USA. Our curtain system can be made up to 27' tall and 19'8" wide per individual curtain. Whether you choose to utilize the standard track or the premium track, your Clean Curtain Wall comes standard with:

- **Heavy-duty 40 mil double polished clear USDA grade PVC material** is non-porous and sheds water, solutions, and dirt.
- **6" between stainless steel grommets allows overlap** to protect against wash spray breakthrough, maximizing production line separation during wash down.

Damage a curtain? We've got your back.

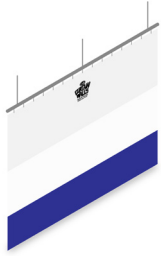

Accidents happen, and we're here to make sure you can stay up and running. **Goff's curtain panels are easy to replace, and affordably priced** to keep your plant operational.

Safe & Strong Heat-Sealed Technology

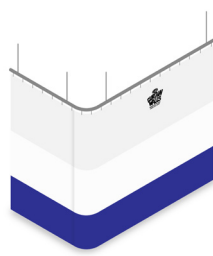

Goff's Clean Curtain Walls utilize heat-seal technology to fuse edges and seams, eliminating potential contamination. This also provides a clean and finished edge.

Single Curtain:

Use a single Clean Curtain Wall for instant lateral separation between tasks.

Two-Sided Curtain:

Create an L-shaped partition to segment off a corner of your building as separate space.

Three-Sided Curtain:

Add a 3-sided curtain wall to one of your permanent building walls to create a private room.

Four-Sided Curtain:

Build an entirely standalone room using a 4-sided curtain wall for modular space design.

Easily Access your Wash Down Space:

Designed for wash down and wet applications, our durable Clean Guard doors are the perfect addition to creating a fully integrated and accessible wash down area. Featuring a NEMA4X rated Intelligent Control System, IP65 motor & IP67 safety sensors, and corrosion-resistant materials, Clean Guard helps you maximize sanitation in your facility to prevent cross-contamination in your work areas.

Goff's delivers more than you expected.

With over 30 years of experience, the Goff's team is committed to delivering the most reliable and innovative solutions to improve efficiency in your facility.
