

FEATURES & BENEFITS

- ✈ Affordable and user friendly machines with more standard features than any other pallet wrapper in this price range
- ✈ A quality machine **completely manufactured and assembled in North America** with quality components and supported by a local qualified distributor.
- ✈ State of the art manufacturing facility. All manufacturing processes from design through machining, welding, painting, and assembly are performed in house. This control allows for the highest quality possible.

INCLUDES A POWERED PRE-STRETCH
FILM CARRIAGE WITH SAFETY DOOR
FOR EASY FILM THREADING

PILOT

WITH SEMI-AUTOMATIC LOW PROFILE TURNTABLE

The PILOT is a budget friendly pallet wrapper designed with durability in mind and completely manufactured and assembled in North America with these standard features:

- ✈ Powered pre-stretch carriage with safety door for ease of threading and variable tension control
- ✈ Carriage mounted safely on the opposite side of the tower away from controls and operator traffic
- ✈ Portable with forklift lifting tubes at both ends
- ✈ 4000# turntable capacity with 1 to 12 RPM variable rotation speed and maintenance free roller bearing support – no steel on steel contact
- ✈ HMI operator interface for different wrap parameters and provides helpful diagnostic information
- ✈ Maximum load size to safely clear the tower: 50" x 50" (71" diagonal) x 80" H plus up to 4" top overlap

OPTIONS:

- ✈ Model PILOT-NP with a non-powered film carriage. Best for netting and pre-stretched film.
- ✈ Extended tower for 110" wrap height and ramp for pallet jack loading options are available
