Optimized Quality

D505

Ideal product quality
will be achieved using
the new Saeplast D505
and DXS310F containers

DXS310F

From the Start

Saeplast is pleased to be able to introduce two new Saeplast PUR Containers developed for use on-board all fishing vessels

The Saeplast PUR DXS310F will be used as a multi-purpose container – for live bait storage, ice storage and for fresh fish/shellfish catch storage. For storing bait for their days trips or storing ice for the fresh catch to storing the day's catch, the DXS310F is well suited for any size fishing vessel. The small footprint fits easily around most decks and the low height allows for ease of access into and out of the container.

The Saeplast PUR D505 has been designed around the needs of the North Atlantic Lobster Industry. The D505 is an extension of the live lobster holding containers that Saeplast already offers the market. There has been a need for a container to hold two lobster crates safely and to allow room for additional ice. After working with industry leaders, Saeplast has brought the D505 solution to the market. The Saeplast PUR D505 will hold two lobster crates and ice as required. Plus, it also functions as a good ice or bait container.

With improvements to the lifting handles, improvements to the overall design, to the large area for logo printing, the new Saeplast PUR DXS310F and D505 are important containers for all your on-deck requirements. The PUR insulation gives you peace of mind that your ice and your fresh catch will remain at optimal temperature.

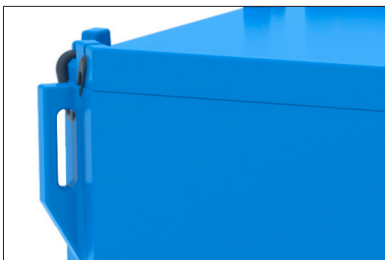

Trust the innovators, not the imitators

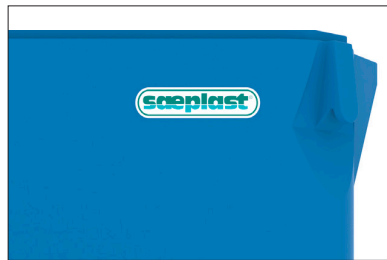

DXS310F: Molded in lifting handles

DXS310F: Easy access for forklifts

D505: Molded in lifting handles

DXS310F: Large area for logo printing
D505 also available for logo printing
