Material Handling, Storage & Packaging Solutions

53 Years Proudly Serving the Pacific Northwest
MHEDA MVP Award Winner for 4 Consecutive Years

PROBLEM SOLVERS. SOLUTIONS EXPERTS.
WE HELP STRENGTHEN THE STRUCTURE
BEHIND YOUR BUSINESS.

SYSTEMS

PRODUCTS

PACKAGING

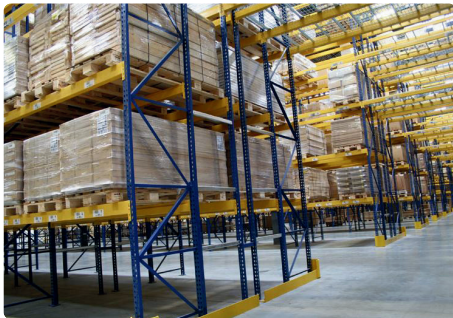

ANALYZE

A thorough facility walkthrough allows us to understand your operations before proposing any solutions.

DESIGN

Engineered layouts optimized for your workflow, space, and growth plans.

INSTALL

Permitting and installation that ensures safe, timely delivery.

SUPPORT

Long-term partnership with our team that understands your operations.

Guiding You to Smarter Material Handling Solutions, Every Step of the Way

Need more space but cannot expand?

Engineered racking, shelving, mezzanines, and modular offices help maximize your existing footprint and improve material flow.

Dock downtime slowing throughput?

Reliable dock equipment that keep freight moving and reduce costly delays.

Processing, storage, or handling inefficiencies?

Industrial containers and pallets improve material flow, product viability, and organization.

Cold chain compliance pressure?

Insulated doors and containers help protect temperature integrity and product quality.

HACCP audit approaching?

Food grade systems and tools that help you stay compliant, prepared, and confident.

Packaging line need a speed boost?

Stretch wrap, strapping, and automation solutions that increase speed, consistency, and output.

➤ *Get expert eyes on your facility with a **complimentary warehouse walk-through and preliminary pallet rack repair assessment**. Let's improve efficiency and identify safety risks together. (See **page 11** for more details)*

➤ **Industries we serve:**

Seafood | Food Processing | Manufacturing | Distribution
Pharmaceutical | Aerospace | Government | Retail

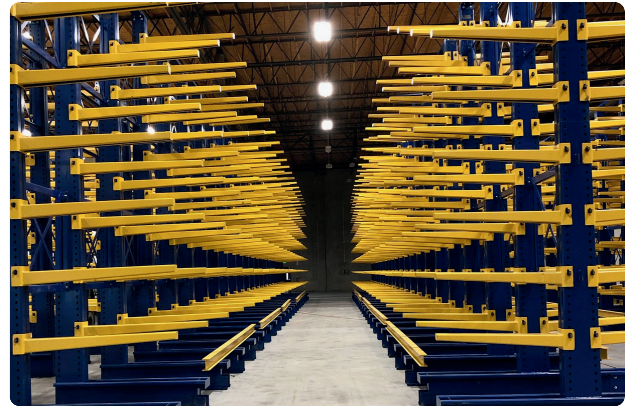

The DACO Difference

More than a Supplier, Your Strategic Partner

We are Not Just Order Takers, We're Problem Solvers, and Insiders to Your Business.

We are Invested in Your Business, Delivering Solutions for Your Long-Term Success.

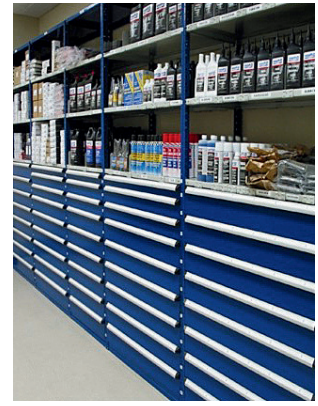

PALLET RACKING

Turn Cluttered Storage into a Productive, Organized Operation. When your warehouse is running out of space, the right system can double storage density without adding a single square foot of real estate. We design, engineer, permit, and install the system; you get more storage and better flow.

- Selective
- Carton/Case Flow
- Rack-Supported Structures
- Cantilever
- Pallet Flow
- Used Pallet Rack
- Push Back
- Drive-In & Drive-Thru
- Pallet Rack Repair

METAL SHELVING

Turn Cluttered Storage into Organized, Efficient Workflow. Metal shelving keeps products visible, accessible, and properly stored. A well-organized storage system reduces wasted motion, speeds picking, and helps teams maintain order as inventory grows. The right shelving solution helps your facility stay productive and adaptable.

- Boltless Steel Shelving
- High-Density Systems
- Automotive Storage
- Open & Closed Shelving
- Modular Cabinets
- Tire Rack Storage
- Mobile Aisle
- Shelf-Supported Mezzanines

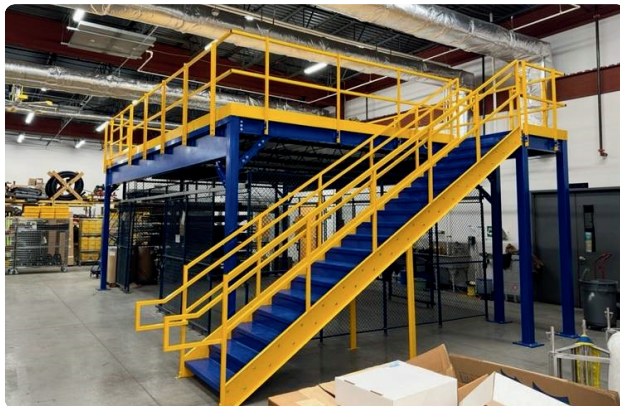

MODULAR OFFICES & PORTABLE BUILDINGS (GUARD SHACKS)

Create Functional Space Without Expensive Construction. Modular offices and guard shacks add secure, professional work areas inside or outside your facility. Dedicated areas for staff are created while valuable floor space is preserved through the use of unused vertical space.

- One-&-Two Story Offices
- Shipping & Receiving Offices
- Administrative & Operations Offices
- Clean Rooms
- Equipment Rooms
- In-Plant Offices
- Machine Enclosures
- Guard Shacks

CUSTOM MEZZANINES & EQUIPMENT PLATFORMS

Double Your Usable Space Without Moving or Expanding. Mezzanines create elevated areas for storage, offices, or production. This allows you to use unused vertical areas to gain more square footage, without expanding your building or sacrificing floor space.

- Single Level
- Multi-Tier
- Shelf-Supported
- Modular Platforms
- Cat-Walk

WIRE SECURITY CAGES, PARTITIONS & LOCKERS

Protect Valuable Inventory While Maintaining Visibility. Wire security systems create controlled storage areas without blocking light or airflow, helping prevent theft and organize sensitive materials.

- Wire Security Cages
- Wire Partitions
- Wire Storage Lockers

CONVEYOR

Keep Products Moving and Eliminate Workflow Bottlenecks. Conveyor systems reduce manual handling and keep products moving consistently through your facility. By improving workflow and reducing bottlenecks, they help teams process orders faster and more reliably.

VERTICAL LIFT MODULES (VLMs)

Unlock Vertical Storage and Accelerate Order Picking. High-density vertical storage systems can reclaim up to 90% of floor space compared to traditional shelving. They improve storage density, reduce walking time, and help teams access inventory faster while keeping operations organized.

PRODUCTS

AIR CURTAINS

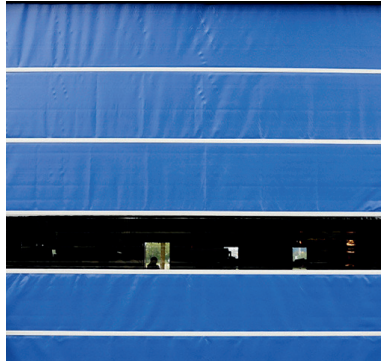

Protect Your Facility While Doors Stay Open and Work Keeps Moving. Air curtains create a powerful invisible barrier that keeps outside air, insects, and contaminants from entering your facility. They help stabilize indoor temperatures, reduce HVAC strain, and improve employee comfort near doors.

CRANES & HOISTS

Move Heavy Materials Safely and With Greater Control. Crane and hoist systems give your team the ability to lift, position, and handle heavy loads efficiently, helping reduce physical strain, improve precision, and create a safer, more productive work environment.

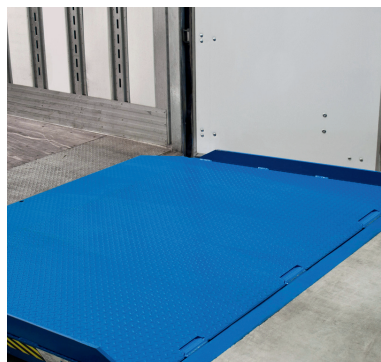

INDUSTRIAL DOORS

The Right Door Pays for Itself in Energy Savings and Uptime. High-speed doors reduce HVAC loss, while cold storage doors protect product integrity. The wrong door in the wrong application can cost you every day. We help you choose the right solution the first time to regulate your environment, manage traffic, and keep your team working safely and efficiently.

- Sectional
- Cold Storage/Freezer
- High Speed
- Bi-Parting
- Overhead Coiling
- Traffic

LOADING DOCK EQUIPMENT

Dock Equipment That Keeps Your Operation Running. Your loading dock is one of the busiest points in your facility. The right dock equipment helps ensure safe loading, smoother traffic flow, and dependable performance day after day. From levelers and seals to restraints and lighting, properly designed systems help keep trucks moving and operations productive.

- Loading Dock Levelers
- Edge of Dock Levelers
- Dock Boards & Plates
- Vehicle Restraints
- Dock Seals & Shelters
- Lighting & Safety

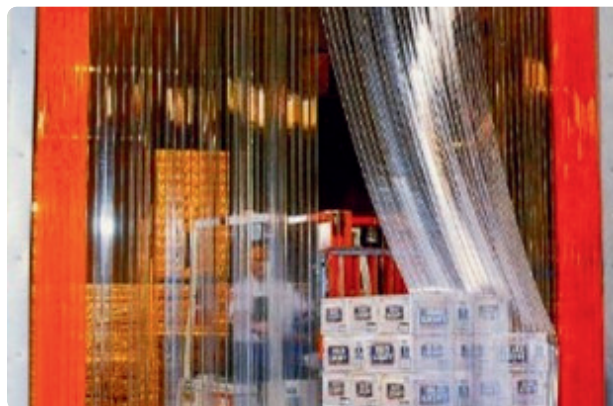

CURTAIN WALLS

Create Clean, Organized Work Areas Without Permanent Construction. Curtain wall systems create clean, controlled work areas while maintaining visibility and airflow. They help separate processes, control dust or temperature zones, and adapt easily as operations change.

- Industrial Curtain Walls
- Climate Curtain Walls
- Clean Curtain Walls

STRIP CURTAIN DOORS

Maintain Temperature Control While Traffic Moves Freely. You need doors that allow constant movement without sacrificing temperature control. Strip curtain doors let your employees move freely while helping reduce energy loss, block debris, and maintain consistent interior conditions.

- PVC Strip Curtains
- Data Center Curtains
- Clean Room Curtains

ANTI-FATIGUE MATTING

Reduce Worker Fatigue. Anti fatigue matting helps reduce strain on workers who stand for long periods of time. By improving comfort and reducing fatigue, these mats help maintain focus, reduce injury risk, and support productivity.

- Pre-sized Mats & Runners
- Custom Sizes & Shapes

SCISSOR LIFT TABLES

Bring Work to the Right Height. Scissor lift tables bring materials to the correct working height, reducing bending, lifting, and strain. They help protect employees while improving efficiency in packing, assembly, and material handling tasks.

- Stationary
- Mobile

INDUSTRIAL CONTAINERS, DOLLIES & UNDERCARRIAGES

Process, Move, Store, Ship and Protect with Confidence. Whether you operate in food processing, agriculture, seafood, manufacturing, or distribution, you need to move products safely and efficiently through every stage. Containers such as food-grade totes, stack-and-nest bins, bulk bins, collapsible and insulated options help protect ingredients, parts, and finished goods. Each container option can help throughout harvest, processing, production, storage and transport.

- Fixed Wall
- Collapsible
- Insulated
- Hand Held
- Dump Tubs
- Plastic Buckets
- Hoppers
- IBC's Liquid Transport
- Milk Crates
- Plastic Corrugated
- Plastic, Aluminum & Steel Dollies
- Undercarriages

FOOD & MATERIAL HANDLING HACCP TOOLS

Prevent Cross-Contamination and Stay Audit-Ready. Color-coded HACCP tools and food-grade containers help reduce sanitation and contamination risks while keeping your facility organized, compliant, and ready for inspection.

- Plastic Shovels
- Brushes & Brooms
- Squeegees
- Mixing Paddles & Scrapers
- Plastic Scoops
- Scrub Pads
- Dust Pans
- and More

PALLET JACKS

Make Moving Pallets Faster and Safer. Heavy pallet loads can slow down operations and strain your team. Pallet jacks give your employees the control to move loads quickly and safely, helping improve staging, transport, and loading efficiency across your facility.

- Standard
- Grease Fitting
- Galvanized
- Stainless Steel

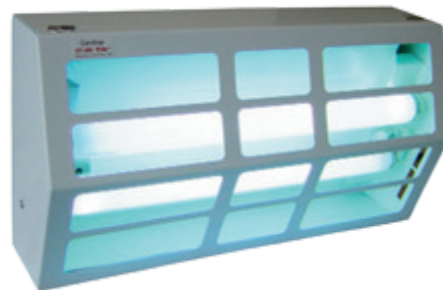

PLASTIC PALLETS

A Cleaner, Stronger Alternative to Wood Pallets. Wood pallets can splinter, trap moisture, and harbor bacteria. Plastic pallets offer consistent strength, improved sanitation, and longer service life while resisting moisture and supporting automated handling systems.

- Export
- Nestable
- Stackable
- Rackable
- Distribution
- Drum

BUG ZAPPERS & LIGHT TRAPS

Maintain Sanitation Standards. Bug zappers and light traps help control flying insects before they become a contamination risk. They support food safety programs, HACCP compliance, and overall facility cleanliness.

- Electrocuter & Light Traps
- Interior & Exterior
- Wall, Corner, Ceiling & Portable

PACKAGING EQUIPMENT & SUPPLIES

Protect Your Products While Keeping Shipments Moving. You need packaging that protects your products and keeps shipments moving efficiently. The right packaging equipment and materials help secure your loads and keep products protected from your facility to their destination.

- Stretch Wrappers
- Strapping Machines
- Carton & Case Sealers
- Industrial Scales
- Commercial Vacuum Sealers
- IBC Poly Liners
- Stretch Wrap & Strapping
- Paper IBC Containers
- Corrugated Plastic

SEAFOOD PACKAGING

Preserve Seafood Quality. When shipping seafood, maintaining freshness is essential. The right packaging solutions help control temperature, prevent contamination, and protect delicate products from dock to destination. Insulated containers, liners, and moisture-control materials help ensure your product arrives in the best possible condition.

- Insulated Foam Containers/Shippers
- Corrugated Fresh Seafood Shippers
- Corrugated Shipping Boxes
- Poly Liners & Sheets, Paper Bags
- Gel Ice & Soaker Pads

COMPLIMENTARY WAREHOUSE WALK THROUGH

Your team moves fast, but the warehouse layout may be slowing them down. Forklifts double back. Picking paths cross. Inventory ends up in the wrong place. Meanwhile valuable vertical space goes unused.

Our warehouse walk-through helps you quickly identify opportunities to improve flow, efficiency, and space utilization.

What You'll Receive

Preliminary Walk Through

- One-hour on-site review
- High-level evaluation of layout, workflow, and material flow
- Identification of efficiency gaps and space opportunities

Start Unlocking the Space and Efficiency Already in Your Warehouse

Schedule your complimentary walk-through and receive practical insights you can act on immediately.

PALLET RACK REPAIR ASSESSMENT

Damaged rack is more than bent steel. It is risk to your product, your people, and your operations.

DACO provides expert rack repair that restores strength and extends the life of your system, at a fraction of replacement cost.

Free Preliminary Rack Repair Assessment

Know what needs attention before it becomes an emergency.

Our free assessment includes:

- Report identifying key areas for repair
- Preliminary repair cost

A **comprehensive, detailed survey and repair plan** is completed once you move forward with the project.

No obligation. Complete clarity.

Request your **FREE** Preliminary Rack Repair Assessment today!
